

## ONE PIECE DOUBLE HOOK HEADGUARD

Heavy wire construction with latch hooks, exposed for easy installation

Available with spot welded 4-1/2" baffle plate

45-30-100: 1/2" IPS  
45-30-103: 3/4" IPS  
45-30-104: with baffle plate available chrome plated or white

Stock finishes: powder coated red, white and chrome plated

### Description

Both the 1-pc and 2-pc head guards are designed to provide protection against low level impacts to the sprinkler head. The 1-pc design features a dual hook attaching system to allow for installation on most 1/2" and 3/4" IPS sprinkler heads. The 1-pc also can be provided with a water shield for in-rack sprinkler systems. Available in either red or chrome finish.

**Caution:** Head guards will not protect sprinkler heads from severe abuse or impact.

**Installation:** 1-pc Head Guard installation can be accomplished without tools and can be installed in the pendent\* or upright position. Disengage both hooks on either side of the guard. Spread the cage open just enough to clear the sprinkler frame and deflector being careful not to damage the sprinkler. Engage the open end of the cage at the base of the sprinkler between the frame and the threads. Reengage both hooks on either side of the sprinkler. plate

### Specs:

Type: Formed wire cage

Sizes: 1/2" or 3/4" IPS

Material: .12" steel wire

Finishes: Red enamel & Chrome

\* The 1-pc head guard with shield will not function properly when installed in the pendent position. For this application use a 1-pc head guard without the shield and a water shield that will thread onto the sprinkler base according to the sprinkler head manufacturer's specifications.
